This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-20 (canceled)

Claims 21 (currently added): A method of inhibiting the proliferation of cancer cells comprising contacting cancer cells with an effective amount of gemcitabine in combination with an effective amount of an antisense oligonucleotide 8 to 30 nucleobases in length which is targeted to a nucleic acid molecule encoding human ras, so that proliferation of cancer cells is inhibited.

Claim 22 (currently added): A method of preventing or treating cancer in an animal comprising administering to said animal an effective amount of gemcitabine in combination with an effective amount of an antisense oligonucleotide 8 to 30 nucleobases in length which is targeted to a nucleic acid molecule encoding human ras, so that cancer is prevented or treated in said animal.
